RSVP to attend by September 12 to Kit Cam at Somkhit.b.cam@wellsfargo.com

Join us at a panel discussion with Quantitative Analytics Program and Corporate Risk Development Program participants to learn more

You're invited to attend a unique career exploration event that will introduce you to the opportunities and culture of Wells Fargo.

The **Quantitative Analytics Program** is a professional development program aimed at Master's and PhD graduates that provides participants with a 12-month orientation to Wells Fargo and an opportunity to gain comprehensive professional industry experience. Fellows will work under the supervision of a senior team member to learn how to develop, implement, calibrate, or validate quantitative models.

The **Corporate Risk Development Program** focuses on building risk management acumen and developing a deeper knowledge of how to identify, assess and mitigate risk through on-the-job experience in one of our corporate risk groups including risk-aligned teams (Compliance, Credit Risk, Operational Risk, Strategic Risk) or business and enterprise-function teams (Consumer Lending, Consumer Small Business Banking, Corporate & Investment Banking, Finance, Wealth & Investment Management), or Independent Testing & Validation.. This program is open to undergraduate and Master's graduates.

Summer internship opportunities are also available.
